HIGH-PERFORMANCE MACHINES FOR HEALTHCARE'S TOUGHEST JOBS

UniMac machines are engineered to handle the non-stop demands of long-term care laundry. Our washer extractors and tumble dryers are foundational to helping reduce your facility's costs and improve efficiency. Ready to run 24/7, without compromising the softness or quality of medical linens, UniMac machines deliver:

- Fast fill and rinse cycles, with 2X more valves than other washing machines.
- Drying times with increased throughput and 3X the extraction speed than competitors.
- Programmable, advance-start features in 34 languages to save labor time without sacrificing quality.

DO MORE WITH CORE

In the high-demand, highly regulated world of healthcare, you need laundry technology that helps you manage it all. Trust CORE's smart management tools to make your job easier.

REMOTE PROGRAMMING

Customize wash cycles on-site or off-site to keep throughput high and your medical textiles in top condition.

SEAMLESS MANAGEMENT

Oversee laundry operations on your own time, from any location, to maximize efficiency across your facility.

PROMPT SERVICE ALERTS

Maintain strong medical standards and prevent downtime with real-time alerts.

TRUSTED ANALYTICS

Meet the medical industry's stringent hygiene expectations with the ability to accurately track operational processes and receive insightful data analysis.

WORK SMARTER WITH UNIMAC

Breathe easier with UniMac machines and CORE technology supporting your healthcare operations. Access real-time data and key performance insights to guide the way—helping you run smoother and leaner, reduce costs and maximize patient care.
